- custom design possible

• Description

Monitors SEM12-F are used as replacement for 14" CRT-monitors in control systems Elotherm of AEG.

The default timing is compatible to the control, this means after connecting the monitor the visualisation works correctly. Further adjustments can be made via on-screen-menu. The connector and interface for the graphic-signal are compatible to the control, so the replacement is easy. Mounting via 2-frontpanelsystem in existing section of the control panelfront.
