Description

Monitors SEM12-F are used as replacement for 14" CRT-monitors in control systems Makino EDNC 64 with control MGC. The default timing is compatible to the control, this means after connecting the monitor the visualisation works correctly. Further adjustments can be made via onscreen-menu. The replacement-monitor will be connected via screwclamps to the graphic-signal and power supply, so the replacement is easy. Mounting holes in the frontpanel to fix the monitor in the crt-chassis of the tube, this means fast and simple replacement with no specialized knowledge.
